REPORT ON THE CODED WIRE TAG RETURNS FOR 2002

Dr N Ó Maoiléidigh
Anne Cullen
Tom McDermott

This report gives recapture details of microtagged salmon recovered during the 2002 commercial fishing season summary format. The report includes 2 sea winter recoveries, that is those fish which were released and migrated in 2000. The 1 sea winter results for these releases can be found in the 2001 report.

The tag code and the release information pertaining to that code are at the top of the page. The first table at the end of the listing gives a summary of the distribution of recoveries over the various fisheries. It should be noted that the number of freshwater returns in this table may include tags recovered from rivers other than the release river. The final table shows the distribution of recoveries over time.

If tags of Irish origin were recovered in the Faroese or West Greenland fisheries, they are also included in this report.

ACKNOWLEDGEMENTS

We would like to acknowledge the contributions to the Salmon Micro-tag Programme of the following: staff of the Central and Regional Fishery Boards, E.S.B., Galway Salmon and Eel Fishery, hatchery managers and staff, fish processors and dealers, commercial and sport fishermen, bursary students and all those who have assisted with the programme over the years.
