

Basking sharks have been reported measuring up to 15m long!

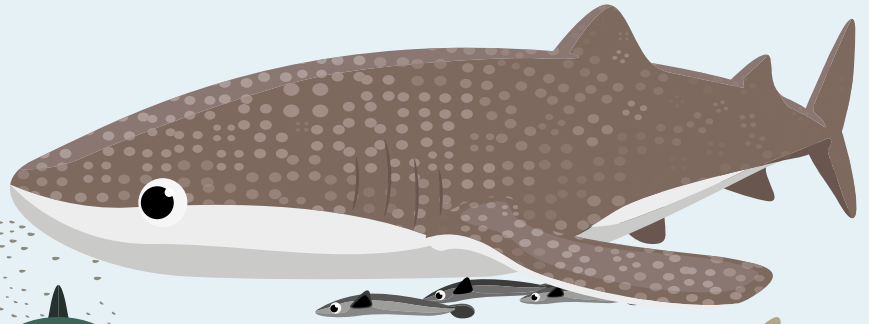

BASKING SHARK
(*Cetorhinus maximus*)

9.8m (female) | 7.5m (male) | 3,628kg (est) |
50yrs (est) | 0 - 2000m (depth) |
IUCN Status: Endangered

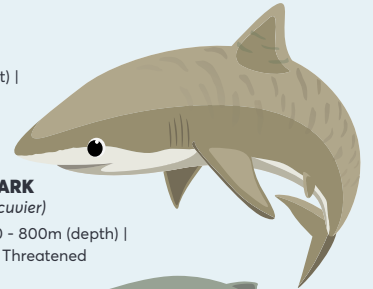

MEGAMOUTH SHARK
(*Megachasma pelagios*)

7.09m (female) | 5.49m (male) | weight & lifespan unknown |
150 - 600m (depth) |
IUCN Status: Least Concern

WHALE SHARK
(*Rhincodon typus*)

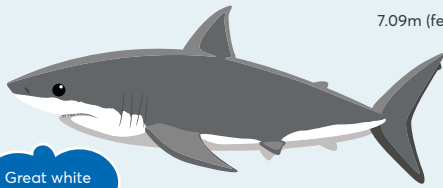

20m (female) | 17m (male) | 34 tonnes (est) |
80.4yrs | 0 - 1,928m (depth) |
IUCN Status: Endangered

TIGER SHARK
(*Galeocerdo cuvier*)

7.5m | 807.4kg | 50yrs | 0 - 800m (depth) |
IUCN Status: Near Threatened

Great white sharks have been reported measuring up to 6.4m long!

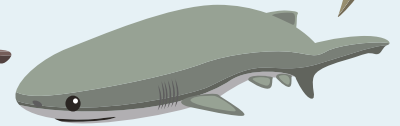

GREAT WHITE SHARK
(*Carcharodon carcharias*)

5.94m (female) | 5.5m (male) |
1,100kg (est) | 36 yrs | 0 - 1,200m (depth) |
IUCN Status: Vulnerable

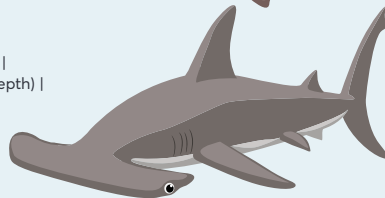

GOBLIN SHARK
(*Mitsukurina owstoni*)

6.17m | 30 - 1,300m (depth) |
IUCN Status: Least Concern

BLUNTNOSE SIXGILL SHARK
(*Hexanchus griseus*)

6m | 590kg | 1 - 2,500m (depth) |
IUCN Status: Near Threatened

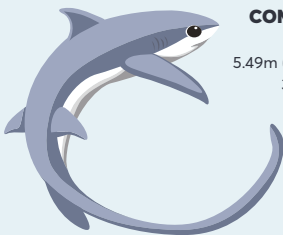

GREAT HAMMERHEAD SHARK
(*Sphyrna mokarran*)

6.10m | 449.5kg | 30yrs | 0 - 300m (depth) |
IUCN Status: Critically Endangered

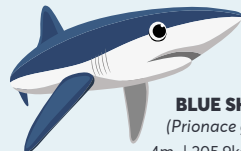

GREENLAND SHARK
(*Somniosus microcephalus*)

4.6m (female) | 4.27m (male) | 1 tonnes |
392 - 500yrs (est) | 0 - 2,992m (depth) |
IUCN Status: Vulnerable

COMMON THRESHER SHARK
(*Alopias vulpinus*)

5.49m (female) | 5.73m (male) | 348kg |
38yrs | 0 - 650m (depth) |
IUCN Status: Vulnerable

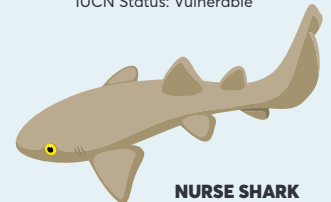

BLUE SHARK
(*Prionace glauca*)

4m | 205.9kg | 20yrs |
0 - 1,082m (depth) |
IUCN Status: Near Threatened

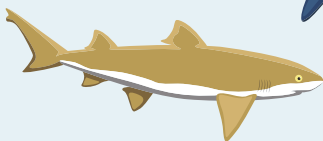

SHORTFIN MAKO SHARK
(*Isurus oxyrinchus*)

4.45m | 505.8kg | 32yrs |
0 - 888m (depth) |
IUCN Status: Endangered

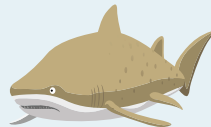

NURSE SHARK
(*Ginglymostoma cirratum*)

4.3m | 109.6kg | 25yrs |
0 - 130m (depth) |
IUCN Status: Vulnerable

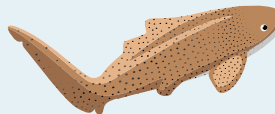

LEMON SHARK
(*Negaprion brevirostris*)

3.4m | 183.7kg | 25yrs |
0 - 92m (depth) |
IUCN Status: Vulnerable

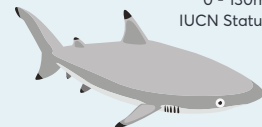

SAND TIGER SHARK
(*Carcharias taurus*)

3.3m | 158.8kg | 35yrs | 1 - 190m (depth) |
IUCN Status: Critically Endangered

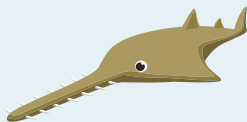

ZEBRA SHARK
(*Stegostoma tigrinum*)

3.54m | 20kg | 30yrs | 0 - 90m (depth) |
IUCN Status: Endangered

BLACKTIP SHARK
(*Carcharhinus limbatus*)

2.86m | 122.8kg | 12yrs | 0 - 140m (depth) |
IUCN Status: Vulnerable

COMMON SAWSHARK
(*Pristiophorus cirratus*)

1.37m | 8.2 kg | 15yrs | 37 - 310m (depth) |
IUCN Status: Least Concern

DWARF LANTERN SHARK
(*Etmopterus perryi*)

20cm (female) | 17cm (male) | 0.9kg | 30yrs (est) |
230 - 530m (depth) |
IUCN Status: Least Concern

BONNET HEAD SHARK
(*Sphyrna tiburo*)

1.5m | 10.8kg | 12yrs |
10 - 80m (depth) |
IUCN Status: Endangered

SMALL-SPOTTED CATSHARK
(*Scyliorhinus canicula*)

1m | 3.7kg | 12yrs |
10 - 780m (depth) |
IUCN Status: Least Concern

KEY

Size (m) = metres. Unless specified, the length of the shark refers to the male species / or the gender has not been provided. | Weight (kg) = Maximum weight in kilograms | tonne = 1 tonne is equal to 1000kg

Lifespan (yrs) = Maximum years sharks are reported to live for | Depth (m) = The depth range in which the shark species is found | International Union for Conservation of Nature (IUCN) Red List - showing the status of sharks risk of extinction.

Information about different shark species may vary, as new discoveries and research is carried out by scientists. Most data used for this graphic has been sourced from Fishbase.org
